

CONSULTING ENGINEERS

Introducing RWDI-Anemos Ltd.

The world's leading wind engineering and speciality industrial and environmental consulting firm.

OVERVIEW

In September 2004, Rowan Williams Davies & Irwin Inc. (RWDI) of Canada and Anemos-Associates Ltd. of England agreed to merge and form a new company called RWDI-Anemos Ltd.

Founded in 1972, RWDI is a leading wind engineering and speciality industrial / environmental consulting services firm based in Guelph, Ontario, Canada.

Anemos Associates Limited was formed in 2001 by bringing together some of the UK's leading experts in wind effects of buildings and structures, offering testing and interpretation to assist a wide range of UK clients.

WHY MERGE?

By coming together, our companies will deliver exceptional wind engineering resources, expertise and experience to European and Middle Eastern clients. You can rely on our knowledge to provide useful, understandable wind engineering solutions. We are a well-run company with a trusted reputation, sophisticated technology and superior training that allow us to provide the most useful, understandable wind engineering solutions available.
